PROFESSIONAL SUMMARY

AI automation specialist with 4+ years spotting where repetitive work slows companies down — and removing it. Started on the operations side (executive management, distributed-team coordination) before moving into building the automations myself: AI agents and workflows in n8n, Zapier, Make, and Airtable powered by Claude AI, integrated with CRMs (HubSpot, Salesforce, Zoho) via REST APIs and webhooks. Results across sales, support, and administrative operations: response times down 30–60%, 10–25+ hours saved weekly per team, follow-up overhead cut 40%. Comfortable owning an automation roadmap end to end — from process discovery through build, adoption, and documentation.
