

UGOCHUKWU OKORONKWO

AI Automation Engineer | Workflow Automation & Systems Integration (n8n, Zapier, Claude AI)

ugochukwuokoronkwo01@gmail.com · +234 902 774 7724 · [linkedin.com/in/ugochukwuokoronkwo](https://www.linkedin.com/in/ugochukwuokoronkwo) · github.com/Hugo0007 · ugo-landing.vercel.app

Remote — Nigeria (WAT/UTC+1) · **Full Eastern-US business-hours overlap**

PROFESSIONAL SUMMARY

AI automation engineer with 4+ years building AI agents and cross-system automations that do real revenue-team work — lead qualification, routing, CRM updates, reporting — end to end, without a human babysitting them. Combines no-code speed (n8n, Zapier, Airtable) with custom orchestration (JavaScript/TypeScript, REST APIs, webhooks) and LLM integration (Claude AI / Claude Code, prompt engineering). Delivered measured business outcomes for SaaS and service SMBs: lead response times cut 30–60%, 10–25+ hours saved weekly, follow-up overhead down 40%. Works daily with stakeholders to turn manual operations into automated systems teams actually adopt — helping every team member work AI-natively.

CORE SKILLS

AI Agents & AI-Assisted Workflows · Workflow Automation · Cross-System Automation · LLM Integration (Claude) · Prompt Engineering · Custom Orchestration · REST API & Webhook Integration · CRM Automation (MarTech) · Process Optimization & RPA · Stakeholder Enablement & Documentation

TECHNICAL SKILLS

- **AI & LLM Automation:** Claude AI / Claude Code, AI agents & AI-assisted workflows, prompt engineering, AI-assisted operations
- **Automation Platforms:** n8n, Zapier, Make, Airtable, Relevance AI
- **Integration & APIs:** REST API integration, webhooks, authentication, data mapping, data transformation & validation, data synchronization, integration troubleshooting
- **CRM & Business Systems:** HubSpot, Salesforce, Zoho CRM, Google Workspace, Microsoft Office Suite
- **Programming & Data:** JavaScript, TypeScript, database management, business process documentation

PROFESSIONAL EXPERIENCE

Automation Specialist — Manny Hall and Associate · Remote — *January 2025 – Present*

- Automated lead capture, routing, and qualification pipelines using Airtable, REST APIs, and webhook integrations — **cutting lead response times by 30–60%** for sales teams at SaaS and service-based SMBs.
- Designed and shipped AI agents and cross-system automations using n8n, Zapier, Airtable, and Claude AI, replacing manual sales, customer-support, and administrative operations end to end.
- Automated recurring reporting, document generation, and administrative workflows with n8n and Zapier — **saving teams 10–25+ hours weekly** while reducing manual processing errors, the equivalent of a fractional hire per team.
- Built API-driven integrations and webhook workflows connecting CRMs (HubSpot, Salesforce, Zoho), Airtable databases, and third-party business applications, with data mapping, validation, and synchronization across systems.
- Applied prompt engineering to Claude AI workflow steps and documented workflows, prompt/template logic, and system configurations — making automations maintainable and adoptable, not one-off scripts.

- Translated business and operational requirements from stakeholders into scalable automation solutions; supported user adoption and troubleshooting so teams kept using what was built.

Executive Management Assistant (Automation-Focused) — Manny Hall and Associate · Remote — June 2023 – December 2024

- Implemented automated task orchestration, communication workflows, and Airtable-based dashboards and templated reports — **reducing follow-up overhead by 40%** across distributed teams.
- Transitioned manual executive and operational workflows into automated systems using Airtable, Zapier, and AI-assisted processes, improving coordination across distributed teams.
- Partnered directly with leadership to translate operational challenges into scalable no-code automation and integration solutions through workflow design.
- Improved execution visibility, workflow consistency, and operational efficiency through standardized processes and documentation.

PROJECTS

AI Lead-Qualification Agent — Claude AI, n8n, Airtable

- Built an AI agent that qualifies inbound leads end to end: Claude AI scores leads from structured Airtable data, then n8n routes them and updates CRM records through REST API and webhook integrations — no chatbot, real completed work.
- Reduced manual lead-processing time and improved response efficiency for the revenue-facing team it served.

Internal Operations Dashboard — Airtable, Zapier, n8n

- Developed centralized internal tooling: an Airtable operations dashboard with automated report and document generation for cross-team reporting.
- Configured workflow triggers, data validation, and notifications with Zapier and n8n — improving cross-team visibility and reliability while cutting administrative overhead.

AI-Assisted Workflow Automation System — Claude AI, APIs

- Created AI-assisted workflows automating repetitive business tasks and internal process execution.
- Integrated multiple third-party tools and APIs to streamline communication and data synchronization across systems.

CERTIFICATIONS

- TEFL Certification — November 2024

EDUCATION

- **B.Sc., Computer Science** — Alex Ekwueme Federal University, Ndufu-Alike, Ikwo (2015–2019)
